

1

Download the template file for the type of document you need to print. The filename of each template indicates the document type.

Example: PrintMyPDF Business Card Template Horizontal.psd

2

Open the template file, and replace the instructions with your own and graphics. Leave crop marks untouched — they are there so the printer knows where to trim the document.

When you have finished adding your artwork, save the file as a PDF.

3

Upload your PDF to PrintMyPDF.com.
